

Client DO'S & DON'TS

DO'S

- Wait 24-48 hours before washing or chemically processing your hair.
- Use a soft, boar bristle brush; starting at the ends and working your way up, always brushing in a downward motion. Brush before shampooing to keep hair from matting.
- Use a nourishing leave-in conditioner from midshaft to ends, keeping away from the tape tabs. For the best results use Hotheads products to keep extensions feeling soft and looking sleek and healthy.
- Wear your hair in a ponytail or loose braid when swimming, exercising and sleeping.
- Have a licensed professional remove and reapply your extensions.

DON'TS

- Don't use any products containing alcohol, oil, or ethanol. Alcohol based products are drying to the hair and can compromise the strength of the adhesive bond.
- Don't brush hair harshly.
- Don't go to bed with wet hair.
- Don't chemically process your hair at home. Rely on your salon professional for any services while wearing extensions.
- Don't remove your extensions yourself.

To ensure your application and consultation meets Hotheads Hair Extensions standards of installation, review the list of Hotheads Stylist Do's & Don'ts.
